# DIDSBURY PIONEER

VOL XXXI. No. 35.

DIDSBURY, ALBERTA, THURSDAY, AUGUST 10, 1934

\$2.00 per year. 5 cents a copy.

## School Starts September 4th.

The Public and High Schools of Didsbury will reopen for the fall term Tuesday next, September 4th, when registration will be completed with. Students are requested to bring their departmental reports.

## Another Car Accident

Driving into the ditch to avoid crashing into a truck which stalled on the highway at the crossroad in Deadrick's corner Monday afternoon, the driver of a Grosfield man, averted what otherwise might have been a serious accident.

The truck, driven by Bill Monecy of Didsbury, stalled on the highway in the corner northeast of town. The Grosfield car coming south, was steered into the ditch and overturned three times to avoid crashing into the truck.

One side of the car and the windshield were badly damaged, and other trouble necessitated the car being towed into town behind a wrecker. Mrs. Ed Clark of Grosfield escaped without serious injury.

## Entertains I.O.D.E.

Mrs. A. G. Studer entertained Mens Chapter, I.O.D.E. on Monday evening when a business meeting was held to get affairs in order for the fall season.

Mrs. E. G. Ranton, who was formerly 2nd Vice Regent, was elected 1st Vice Regent to replace Mrs. W. C. Keith. Mrs. J. A. McChes was elected 2nd Vice Regent.

It was decided to again hold an Art and Handicrafts Exhibition on the last Saturday in October. The exhibit last year was such a success and created so much interest that the Chapter hopes that this year's may be even bigger and better, and that anyone possessing anything of interest either in the line of antiques or handicrafts, will be kind enough to loan it on this occasion.

The Chest of Silver and Silver Tray now on exhibition in one of the store windows will be the main prize given away on the last Saturday in October.

## Calgary Citadel Boys Band Play Here on Labor Day

The citizens of Didsbury and district are in store for a special treat Monday evening, September 3 at 7:45 when the Calgary Citadel Boys Band will be visiting the town. The Band consists of a very fine combination of 26 youthful instrumentalists whose ages range from 8 to 15 years. The program contains both vocal and instrumental music and will last about an hour and a half.

The band is under the baton of Chas. Stunell, who is himself a noted trombone player, and who will be heard in several solo numbers during the program.

Wilfred Honeychurch, baritone, who is well known to a large number of radio fans, and also a member of the band, will render selections.

Arthur Honeychurch, elder brother of Wilfred, will be the guest-vocalist during the trip, and will be participating in the program. He is at present choir-leader of the Calgary Cadet Corps and is a bass vocalist of some repute.

Harry J. Lewin who is in charge of all Y.P. work at the Citadel will be a special visitor with the boys on this trip.

Captain Victor Bishop, officer in charge of this district, with headquarters at Red Deer, is in charge of all arrangements. The band will visit Grosfield, Carstairs, Olds, Bowden and Innisfail, as well as Didsbury.

The Captain wishes to thank the ministers and congregations who made this visit possible.

## Silver Wedding Anniversary.

Mr. and Mrs. Bert Morphy celebrated their 25th anniversary on August 18th. Neighbors and friends visited during the afternoon and evening, wishing the happy couple many more anniversaries together.

At the close a presentation of community plate was given by Westerdale and district.

Four children were born to this union, three sons and one daughter, all of whom are still at home.

## NOTICE

In the interests of public health, and in order to prevent, if possible, the recurrence of an epidemic of dysentery, all citizens, including the vendors of food and restaurant keepers, are urged very strongly to see that all screen doors and second windows are made tight. "Prevent flies from getting in, but if they get in—swat 'em."

See that as much garbage as possible is burned, and if you cannot burn it all, have it placed in covered containers to await removal by the scavenger.

All toilets should be made flyproof. Make all requests for Scavenger or sanitation service at the Office of the Town Secretary. Prompt attention will be given to such requests, and it is hoped that each and every citizen will co-operate in keeping the town clean.

—By Order,

Local Board of Health  
Didsbury.

## Imperial Veterans, Calgary, Visit Local Canadian Legion

The Imperial Veterans of Calgary were visitors at the regular Didsbury Legion meeting Saturday evening last.

Comrade Morgan of Calgary, addressed the meeting on the recent convention of the Dominion Legion. After the address a very enjoyable social time was spent.

## WEEKLY SERMONETTE

"A friendly dog wags his tail—while an unfriendly man wags his tongue."

## LABOR DAY

Business Houses and Stores will be CLOSED ALL DAY MONDAY NEXT, SEPTEMBER 3—LABOR DAY.

## Rev. A. J. Mitchell To Leave for the East

The Rev. Alex J. Mitchell is planning to leave on Monday next, September 2nd, for Kingston, Ont. to attend the General Council of the United Church of Canada, of which he has been elected a member.

While in the East Mr. Mitchell has been invited to address meetings in the Grey, Parry and Peel Provinces on behalf of the missionary and maintenance work of the Church.

He will be away for at least four weeks, and during his absence the following arrangements have been made for the Sunday Service at Didsbury and Westcott.

Sep. 9 Rev. L. Parrell, D.D., Calgary.  
16 Mr. E. S. Morgan, Calgary.  
23 A. W. H. 30-31 A. L. L. B. Oxford Group, Calgary.  
30 Rev. H. D. Marr, M.A., Calgary.

All members and friends are heartily invited to attend the services on Sunday next and give the minister a hearty send-off.

The subject of the sermon on Sunday evening will be "A Church Member's Mourning."

## New Wheat

The first new wheat to be delivered to local elevators came in last Friday and Saturday being combined by Mr. L. A. Ferguson and Mr. Noah Saulin, respectively. Mr. Ferguson delivered his to the Midland Pacific elevator on Friday, the wheat being No. 2, graded and weighing 61 pounds to the bushel.

On Saturday Mr. Swain delivered a load to the new Alberta Pacific elevator. This wheat was also No. 2, graded and weighing 61 pounds to the bushel. Both crops are said to be yielding 2 1/2 bushels to the acre.

Mr. W. C. Meach was threshing at the Didsbury Dairy this week. The crop the shell out at 2 1/2 bushels to the acre and graded No. 2 Grade 1.

## Local Oddfellows Visit Three Hills

A number of the local Oddfellows paid a fraternal visit to the Three Hills Lodge last Thursday evening for the purpose of handing over the Travelling Tapes to the latter lodge. The visiting brothers received a hearty welcome, and a good time was had by all.

## VICTORIA THOMSON L.R.A.M.

## Conscience And The "Talkies"

Hollywood and the motion picture industry have been occupying even more than their accustomed share of the newspaper spotlight during recent months and to some effect. There are indications the results of inquiry and publicity will have a salutary if not salutary influence upon the product distributed for the entertainment and edification of the theatre-going public.

The tremendous potency of the "Talkies" as agents for popular uplift, perhaps transcending that of the pulpit or the press, has found all too belated recognition in official quarters. Steps should have been taken, years ago, to ensure the influence exerted should be for good, for the elevation, and the debasement, of public taste. Institution of a more direct and vigorous censorship at the source of supply now, appears very much like closing the stable door after the horse has been stolen. Much harm has been done already.

Death of Dillinger, who had the unenviable notoriety of being classed as "U.S. Public Enemy No. 1," just as he left a Chicago theatre where a "crime" picture had been shown, came as a somewhat lurid commentary upon the feature of public taste which had been engaging public attention. There had been a surfeit of "crime" films—pictures which, despite the anodyne of a little sickly sentiment, had tended to metamorphose the "public enemy" into the "public hero," to throw a romantic glamor around the gangster and his "Moll," to sugarcoat the sordid and the subversive. The morbid and degrading curiosity of the mob which battled for sanguinary souvenirs of the dead Dillinger (the blood-stained garments and be-spattered paving stones) can be contrasted only as a species of hero-worship—a hero worship gone bad—become depraved and distorted.

The "crime" picture had been accompanied by an apparently endless string of "sex" films. It was only right, therefore, and to be expected, that the Dillinger climax to the first should be paralleled by an equally sensational climax in the case of the second. The "sex" series ended in a notorious "morals scandal" trial which occupied the attention of a Hollywood court at the very time police were ending the hectic career of the gangster.

There is no gainsaying that presentation of crime and sex in the average film has been anything but a healthy influence; nor can it be gainsaid that the sole criterion of motion picture production in the past has been box-office receipts. Such a criterion inevitably led to over-emphasis of sensationalism, the featuring of the thrill; and the anodyne of a little moral sentiment has never been sufficient to neutralize the possible evil effects upon impressionable minds of scenes and sounds of doubtful moral quality.

Action finally has been taken to impose a new and stricter censorship upon the film industry, which proposes to expurgate the more harmful features of Hollywood box-office attractions placed in circulation. The censorship will apply not only to the pictures themselves, but also to the stories procured for film purposes.

Concerning the average story submitted and accepted, there apparently is a reason why they should be trite and commonplace both in theme and presentation. Apparently, there is a premium upon the banal. James R. Gregson, noted playwright and actor, has been giving some rather cynical advice upon "How To Write A Talkie" to readers of the Leeds (Eng.) Mercury. He advises aspiring scenario-writers never to try for style, and never to write like a Galsworthy, or Hardy or a Melville Ford; bare-bones and nothing more is wanted. He concludes in this vein:

"Never mind feeling ashamed of the story—send it off at once before your conscience gets going. And as soon as you've sent it off, start on another—or the same one made slightly different. When your first story comes back from the first film company, send them the second and send the first to another firm. When you have about a dozen stories, keep them circulating. Don't hesitate about sending the same people a story which they have once rejected. They have probably changed their reader in the meantime."

Apparently the motto for those who seek this way to wealth is: "Abandon conscience those who wish success."

## Building Activity At Coast

## Considerable Construction Work Going On In British Columbia

Considerable activity is noted just now in British Columbia construction circles. Road-surfacing, theatre building and home-building are noted in contracts recently signed, while largest of the enterprises is a new mill of the Great Central Sawmills Co., Ltd., which is being built at Port Alberni. Cost of the plant is estimated at about \$600,000, and an average of 500 men will be employed.

Some animals of the same species have more ribs than others.

## Scientists Are Puzzled

## Striped Tree In California Is Producing Pink Lemons

Pink lemons are being grown in California. They are growing on one tree in a grove which has become a Mecca of astounded scientists who gaze at this phenomenon with awe and periodically and gravely pinch themselves. The skin and fruit of the lemons are a vivid pink, but this is not the only strange feature about the tree. The trunk and branches are striped, while some of the branches are white and others green. The white boughs are quite barren.

A German barren owns 20,000 fleas.

## Looseness Of the Bowels During the Summer Months

It is seldom, during the summer, that most people are not troubled with some form of looseness of the bowels. Generally it develops into Diarrhoea, Dysentery or Summer Complaint, and has a tendency to weaken the system.

Do not check the discharges too suddenly. Do not experiment with a new and untried remedy. Do take Dr. Fowler's Extract of Wild Strawberry, a remedy that has been used by thousands of families during the past 88 years.

Do not attempt a substitute. Be sure and get "Dr. Fowler's" when you ask for it.

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

## Giant Mersey Tunnel

## Huge Engineering Feat Is Formally Opened By The King

The world's longest underwater roadway, the giant new Mersey tunnel between Liverpool and Birkenhead, was recently formally opened by the king.

His Majesty pressed a golden switch which rolled back huge green and gold curtains, and formally declared open what has been called the greatest engineering feat of modern times. The tunnel has four lanes for vehicles and broad side-walks for pedestrians.

Who can reflect without awe on that will and power of man which in our times has created the noble bridges of the Thames, the Forth and the Sydney harbor, and has driven also tunnels such as this in which busy streams of wheeled traffic may run in light and safety below the depth and turbulence of tidal waters bearing the ships of the world?

The tunnel is named the Queensway in honor of the queen.

It was conservatively estimated that more than a million persons were present.

The tunnel has been under construction for nine years. Outside of the actual boring the chief difficulty encountered was that of ventilation. The total cost is estimated at \$25,000,000. The tunnel contains a three-mile roadway of special cast-iron sections.

## Chance For Canadian Girls

## Australian Lace-maker Hopes Someone Will Copy His Design

"For the instruction of Canadian girls" an Australian lace-maker, William Blacker of Home Creek, Queensland, has sent to Canada a specimen of lace and two hand-carved serviette rings. They are in the hands of Col. Wilfrid Boxer, president of the Canadian handicrafts guild at McGill University.

In the letter which accompanied the specimens, Mr. Blacker explained he learned to knit and to make Bahing nets during a long illness in his boyhood, and later used this experience to make lace after an idea of his own. The inspiration for the wood carving, he said, was gained through watching Australian aborigines at their work.

Mr. Blacker complained that very few of the girls with whom he has come in contact in Australia have the necessary proficiency in knitting and net making, and they have not the time to learn so he feels that his skill in lace making will be lost. Thinking that because "of the long, cold winters" in Canada, the girls here may be more ready to stay home and knit, he sent samples of his craft and expressed the hope that some Canadian girls "who take an interest in artistic matters may enjoy trying to produce something that will be a novelty."

## Receive Big Salaries

## Motion Picture Stars Receive More Pay Than U.S. President

The United States motion picture industry, even while suffering a loss of \$10,689,393 last year, was shown to have given 110 people larger salaries in 1935 than that received by President Roosevelt.

Three others equalled Mr. Roosevelt in the salary he would have received without his government pay cut—\$75,000.

The peak yearly pay cheque for the industry, \$315,090, was paid to an unnamed actor. The second highest salary of \$296,250, went to an "artist" who received \$10,000 a week when he or she was working.

These figures were contained in a report of N.E.A.'s six months' study of the producing, distributing and exhibiting branches of the film industry.

With the exception of buckwheat, the grains ground in Canada during May, 1935, were lower than in May last year. The amounts in bushels, with the comparative figures for May last year in brackets, were, wheat, 5,258,707 (5,559,063); oats, 578,306 (621,961); corn, 144,344 (194,404); barley, 47,978 (49,211); buckwheat, 3,808 (2,741); and mixed grain, 726,298 (1,021,874).

In his youth, George Washington made a trip to Barbados in the West Indies.

## Well Known "Mountie" Chosen

## Corporate Stalworthy Recommended To Shackleton As Weather Expert

When Edward Shackleton, leader of the Oxford University exploration expedition into the Canadian Arctic this summer, asked the Canadian government for an experienced expert on conditions in the frozen wastes of the far north, Corporal F. H. Stalworthy of the R.C.M.P., formerly a constable in Alberta and now at Ottawa, was immediately named.

Famed for his exploits in the lonely Ellesmere Island district, Corp. Stalworthy will accompany the expedition to that territory where it is planned Shackleton will establish the base.

Five years in various parts of the Arctic and his splendid work on the Bache peninsula where, at one time he was marooned for a whole year, have fitted Corp. Stalworthy for this new post he will fill.

Last November, Miss Hilda Austin, daughter of the rector of St. Catherine's church, Epsom, married Mr. Stalworthy and during his absence in the north she will remain in England with her husband's parents. The expedition planned the journey into the north from the European side and while in Ellesmere land will make an attempt at reaching the north pole.

## Huge Producer Of Gold

## Expect Soviet Output Will Be Second Largest In World

Soviet Russia now ranks as the second largest producer of gold in the world as the result of spectacular output gains in the past two years. The most recent estimates, official and otherwise, indicate:

The 4,000,000 fine ounces of gold which the Soviet Union is expected to produce this year would outstrip both Canada and the United States in total output. The position runner-up to South Africa, Russian output in 1933 is officially placed at 2,489,000 fine ounces by the government, a gain over 1932 of 112 per cent. and more than twice the annual average of Czarist days.

The Soviet government claims to have spent more than 500,000,000 rubles in the last four years on the gold mining industry. Its foreign orders for gold mining machinery have grown visibly. Officials of the Bolshevik regime assert that Russia's gold deposits are well-nigh inexhaustible and that the U.S.S.R. some day will exceed even the Transvaal, richest gold source ever found.

## Tree Planting Plan

## Shelter Belt 100 Miles Wide From Canada To Texas To Be Planned

United States Secretary of Agriculture Henry Wallace announced that work would begin immediately on a shelter belt 100 miles wide extending from the Canadian border in Texas.

President Roosevelt in an executive order signed July 11, allocated \$15,000,000 of emergency funds to begin work.

Canada is specifically mentioned in an order issued by the German government respecting the importation of fruit into Germany. All imports from the Dominion must be shipped direct to specified ports and be subject on arrival to inspection for San Jose scale and railroad wax.

Hunting coyotes with airplanes has become a popular sport in Montana.

## To Save Sugar Crop

## Flies Brought From Brazil To British Guiana By Air Mail

Three men nearly lost their lives on a journey of 1,500 miles to bring some flies from the interior of Brazil to Georgetown, British Guiana. The flies, it is hoped, will save the chief product of this British colony—the sugar crop. In six special packages the flies have travelled 500 miles down the River Amazon to Para by fast motor launch, and then 1,000 miles by air mail. They have been brought to fight the moth borer, a pest which at present destroys about 20 per cent. of the sugar crop by burrowing through the sweet cane. They are "Amazon flies" and their existence—and partially for moth borers—was discovered after two years of research by Dr. J. G. Myers, of the Imperial Institute of Entomology. Dr. Myers set out to bring a "force" of these flies with a number of assistants, and has had an adventurous journey. The launch in which he brought the flies down the Amazon had to be carried on a bullock wagon over twenty miles of mountainous country. Once the boat was swamped in rapids, and Dr. Myers and his two chief assistants had a narrow escape from drowning. All the scientific instruments for the expedition were lost. But the flies were saved and, if conditions suit them, they should obliterate the moth borer.

## University Gets Radium

## Was Most Valued Possession Of Late Madame Curie

The late Mme. Marie Curie's most valued possession, a gram of radium purchased for her in 1921 with funds raised by a committee of American women, has been passed on to the University of Paris with the stipulation that her daughter, Irène Curie, be permitted to use it at will. Mrs. William Brown Meloney, chairman of the Marie Curie radium fund, said she received word of this effect.

Mme. Curie's daughter is herself a distinguished physicist, having virtually grown up in her mother's laboratory and serving as her principal assistant for years prior to Mme. Curie's death on July 4.

Mrs. Meloney expressed a belief that the radium constituted the only property of value left by Mme. Curie, with the exception of a meagre bank account, a plot of land in a Paris suburb and personal effects.

Flour production in Canada for the month of May this year amounted to 1,173,433 barrels, exceeding the amount for the previous month but lower than that for May last year when 1,334,101 barrels were produced.

"Many a young woman," says Dorothy Eiss, "has saved her husband to the top of the ladder" bare, and then decided to hang the picture elsewhere.

## Has Plans For Utilization Of Canadian Wheat Surplus By Producing Valuable By-Products

Plans for utilizing the Canadian wheat surplus to produce valuable by-products by chemical means are being earnestly considered by a scientist at the Canadian Pulp and Paper Research Institute at McGill University.

Dr. W. Boyd Campbell, consulting physical chemist to the forest products laboratories at the institute, discussed wheat surplus in an interview. He stated that in China, by an ingenious method, scientists had succeeded in producing a valuable substance known as monosodium glutamate from wheat, and added that the surplus of the possibilities of converting wheat into more costly products had only been scratched.

"If the Dominion," he said, "were to spend a small fraction of the money it has spent on providing transportation and handling facilities for the Dominion's wheat crop on research for new outlets and new uses of wheat, I believe that the wheat surplus would in time be a forgotten bogey. I would suggest that the Dominion government include in the budget, as a start in the right direction, the sum of \$500,000 to be used in this research over a period of five years."

The monosodium glutamate being made in China, of which Chinese have sold between \$1,000,000 and \$2,000,000 worth annually, was until recently a rare chemical found only in research laboratories in America.

It is used in China and Japan much the same as sugar and salt are used here. It is a condiment used by housewives, restaurants, Buddhists and other vegetarians to impart a meatlike flavor to vegetable diets. As a flavoring agent it is 15 times more powerful than cane sugar and seven times stronger than salt.

Canadian wheat, with its comparatively high content of protein, is the best wheat for manufacture of this condiment, the scientist said. China has been making it for several years and production is shortly to be undertaken on this continent.

As Buddhists regard it against their religion to eat any meat or any food prepared from an animal substance, the condiment has a wide sale in the east. Wheat worth two cents a pound was thus transformed into a substance worth from \$2 to \$3 per pound.

But this was only scratching the surface. Other uses of the surplus could be developed, Dr. Campbell said. In suggesting \$500,000 be spent on research in this direction, he said: "This amount seems small when we consider the millions spent in establishing shipping facilities at Churchill, improvement of St. Lawrence waterways, building elevator terminals, and on creation of extensive transcontinental and branch line railway facilities for the facility in the movement of Canada's wheat crop."

### Must Run Its Course

#### Dry Hot Weather Moves In Cycles State Experts

North American farmers, tormented by drought, have plenty of company in their misery.

Southern Russia's crops have been curtailed, leading to assertions and denial in the press of other countries that famine threatens the Soviets.

Central Europe faces seriously reduced yields of feed grains and wheat and rice harvests.

England has suffered in the hottest weather in 41 years. Manchuria's farmhands have escaped the fate of other countries, but Spain and the lower Danubian countries have experienced hot, dry weather.

Ask the experts what the cause is and they answer that no one can explain fully. Dry and wet weather moves in cycles, weather bureau men say. The present dry "spell" started about 1920. The hope is expressed that it has about run its course.

Japan announces that she is "china's best friend" after seven years of that sort of thing China can still say "chi yes!"

W. N. U. 2057

### Scoop Weighs Twelve Tons

#### Huge Machine Moves 500 Tons Of Earth An Hour

The largest electric excavator ever manufactured in Europe is now being erected at Carby, England, for use at the rolling mill plant being constructed for the production of steel tubes.

The excavator is to be used in the fields adjoining the works for stripping to a depth of fifty feet to seventy-five, the soil or overburden which covers the iron ore needed to feed the huge furnaces of the rolling mills. The machine, which is also known as a stripping shovel, is capable of moving some 500 tons of earth an hour. With it earth can be dug, lifted, rotated, and dumped.

The unusual size of the excavator is indicated in the facts that the job is 100 feet long; the bucket, which scoops out the earth, weighs twelve tons, has a capacity of nine cubic yards, and is capable of holding a full-size saloon car.

### Check Soil Drifting

#### Alberta May Pass New Regulations For Compulsory Tree Planting

How to get more trees across the face of the country in order to check the high winds, stop drifting of soil, and incidentally beautify the landscape is one of the questions that the Alberta government is now taking up.

New regulations that will compel homestead entrants to retain a portion of their land under timber are being considered and may be passed shortly, it was stated by Premier Reid.

It is believed that the passage of regulations requiring homesteaders to keep from 10 to 25 acres in bush and wood-land on each quarter section of land would have a beneficial effect both in the way of controlling the soil drifting and checking the intensity of the winds.

### Combination Is Better

#### Soybean And Corn Make Good Feed For Cattle

The use of the soybean alone for ensilage is not recommended but high quality of feed has been produced by a combination of soybeans and corn, mixed in the proportion of about one part soybeans and three parts corn. The two crops can be grown together or they may be produced separately and mixed at the time of filling the silo. Harvesting will be easier and the mixture better obtained when the two crops are grown separately.

Baseball shoes cost \$10.50 a pair. They're made of kangaroo and the average player wears out two pairs of shoes during a single season.

By Ruth Rogers

404  
LOVELY MODEL FOR FIGURES ABOVE NORMAL WEIGHT

It's helpfully slimming, besides being so cool and smart.

Here's a dress that will stretch your budget for you. It's so comfortably cool and smart to wear to so many places.

It's exceedingly becoming as sketched in white tub silk with nautical blue coin dots. Stripes, checks and gay floral prints could also be used very effectively.

This model entirely in plain plaids in the silks, pique, linen, etc., is also most attractive.

Style No. 404 is designed for sizes 36, 38, 40, 42, 44, 46 and 48 inches bust. Size 36 requires 3 1/2 yards of 39-inch material.

Price of pattern 20 cents in stamps or coin (cash is preferred). Wrap coin carefully.

## Canada Was First Country In The World To Institute A Practical System Of Egg Grading

### Require Delicate Care

#### Oyster Raising Is No Slip-Shod Business State Experts

Tasteful oysters, a delicacy meticulously prepared by the chef, need just as delicate care in their nurturing, in the opinion of J. J. Cowie of Ottawa, secretary of the Biological Board of Canada. With Dr. A. T. Cameron, chairman of the board, he inspected the Biltmore station in Prince Edward Island, where research work in the cultivation of oysters is proceeding.

"This station was established in the first place to discover how Malpeque Bay could be stocked with oysters since the bay was denuded of that shell-fish some years ago, and in the second place the work is intended to develop and demonstrate the best oyster growing methods which may be applied in oyster areas throughout eastern Canada," they explained.

"This advice is especially valuable at the present time in connection with the leasing of areas by the department of fisheries," Mr. Cowie said.

Dr. A. H. Needer, the expert in charge of the work, has surveyed hitherto unproductive areas to the east of Malpeque Bay, and under his advice some of these will soon be leased for oyster culture.

This oyster raising business cannot be handled in a slipshod manner. The tasty shell-fish demand a lot of care and study before they can be harvested in wholesale quantities.

### Non-Profitable Producers

#### Hens Completing Moult By September Should Be Sold

Hens that complete their moult and have a complete set of feathers by September 1 should be sold as non-profitable producers. The hen that has not moulted by mid-September, is still laying eggs and will continue to do so as long as she is permitted to get a full supply of egg-making feed during the shortening days of fall. Natural moult of the best layers comes after October 15 and will last for but a short time, providing the egg laying feeding schedule is maintained through the moulting period. The natural moult of the poor layers comes with the first hot days of summer in June and lasts till fall. The poor layers do not get back to laying till after the late moults because the poor layer is also a lazy hen and will not eat enough to keep her laying.

In Canada and the more northern latitudes and on the tops of mountains, the duration of sunlight during summer is much greater than on the islands or in places nearer the equator.

Per capita consumption of eggs in Canada is the highest in the world—approximately 250 a year. In 1933 total consumption amounted to 3,000,000,000. Why is it that Canadians favour eggs so much? One reason, undoubtedly, is that the Dominion is the only country in the world that has a system of egg grading controlled and supervised by the Dominion Department of Agriculture from producer to consumer. Under this system only good eggs are allowed to present themselves to the consumer as companions with the ham or bacon ration or in the thousand or more ways in which eggs are used in the wide range of cooking.

Eggs also constitute an important item in the economic life of the country as a whole, to say nothing of their incomparable merit in many respects from a food point of view. Their marketable value last year, even at the lowest prevailing price for several years, totalled about \$30,000,000.

Canada was the first country in the world to institute egg grading in any form. It was introduced in 1918. In that year the Dominion had a substantial surplus of eggs and the British market looked up as a possible outlet, but other countries were keen competitors. The officials of the Dominion Department of Agriculture decided in order to establish a market standard of quality that all eggs exported to other countries and those shipped from one province to another should be graded as to quality, size and cleanliness and that the grades should be plainly indicated.

The introduction of graded eggs on the British market established an enviable reputation for Canadian eggs. Wholesalers, retailers and consumers knew exactly what they were buying. The element of uncertainty as to quality was removed with grading. Such eggs soon began to command a premium over the ungraded product shipped from other countries. The grading regulations were also applied to all eggs imported into Canada. It was not long before other countries followed Canada's lead in regard to egg grading.

Soon after the grading system for export eggs and interprovincial shipments came into effect, farmers began to see that the consumer in an overseas market was prepared to pay a higher price for an assured quality product. The advantages of grading began to be obvious to both producer and consumer. The per capita consumption of eggs in the Dominion was then about 16 dozen annually. By 1923 egg grading regulations were enacted to apply to domestic consumption. The Dominion officials concluded that if such regulations as applied to export eggs were a good thing for the farmer, then he would benefit to a greater extent if the grading regulations were made completely effective from producer to consumer in the home market. The wisdom of this was soon made evident for the per capita consumption in 1924 rose to 25.1 dozen. By 1929 it had risen to 30.05 dozen. At the present time it is between 29 and 30 dozen, the highest average of any country in the world.

There are two sound reasons why the Department of Agriculture has shown so much concern and zeal about graded or quality eggs. First, that they felt that the government has a responsibility in seeing the public obtains pure or good food. It is sound business in public health and by insuring that eggs are marketed according to quality, the farmer gets the benefit of greater returns and the poultry industry is thus improved.

Quite naturally, the grading of any product does not meet with immediate approval on the part of all producers. The farmer having his eggs graded for the first time may, in fact, feel something approaching resentment. But he soon realizes that grading is of great advantage.

There are 25,000,000 laying hens on the farms of Canada.

Early Quebec potatoes appeared on the Montreal market on June 26.

### NIGERIAN CHIEF'S VISIT ENGLAND FOR FIRST TIME

A happy stopshot of the Sultan of Sokoto and his Prime Minister, the Emir of Gwandu and the Emir of Kano, with their cabinet ministers and suites, reached England at the same time to be guests of the British Government.

## Looking Forward

Although the West is still somewhat incredulous, the times are improving; it is apparently indisputable that conditions are bettering themselves in other parts of the Dominion. A half yearly survey of the whole picture shows many lines of industry working round to normal. Included in the brighter phases of the national scene is the fact that business generally is 40 per cent. above the low depression mark of March 1933, and is 10 per cent. over December 1933. Employment is up to 18 per cent., and foreign trade is increased 43 per cent. Electric power output is 23 per cent. better and construction contracts are up 83 per cent. There are fewer business failures by 28 per cent. and high grade loans are at the highest level in fifteen years.

Carloadings are 21 per cent. ahead of 1933, and newsprint production is up 41 per cent. Although these facts do not gain full value in the minds of those who as yet, have experienced no quickening of life in their business, yet the increased trade and general pick-up should gradually bring some result to the country west of the Great Lakes. We realized last year very emphatically, how much of our prosperity or adversity is due to nature. We are realizing this anew in 1934 when excellent prospects have dwindled to fair prospects. The probability of wheat prices almost treble those of last year, and a crop prospect generally better than last year, encourages the belief that more money will be circulating in the West, than for some time past. Hog prices have been well maintained, and bring a little revenue in to most farms. At present the position of the cattle men, whether they be ranchers or farmers, is the most discouraging phase of agriculture in the West. It is possible that this may be affected by the Natural Products Marketing Act.

These good reports of business from Eastern Canada can scarcely be echoed as yet in the West. But a couple of months from now the Western scene may be much more hopeful. —Valcan Advocate.

## Apple Case

It hung there, that tempting green apple,  
On a bough that was drooping and low,  
Just where I could reach, and not even a peach  
Could compare with that undripping "Snow."  
I knew that I oughtn't to touch it,  
So I turned away firmly and said,  
"Go, get these behind me, I'm going to find me  
An apple all mellow and red."  
But that apple tormented and teased  
And me,  
And like Eve, I was tempted and fell;  
"Twas appetite tempted, 'twas powerfully pleasant,  
But four hours later 'twas—Well,  
I ain't going to eat no more apples  
Until they're as ripe as can be.  
You can stew 'em, or fry 'em,  
Or bake 'em, or pie 'em,  
But no more green apples for me!  
—L.M.T. in McLean's

## "Kritiks' Korner."

There are some "bumps" in our principal streets that need attention. Let the D.P.W. cruise around town in an automobile and they will have no difficulty in locating them.

Why not have a Flower Show? To sponsor a Flower Show would give one of our civic or fraternal organizations an opportunity to render a worthwhile community service. No place ever yet had too many flowers. Why not in this way encourage the growing of more and better flowers. Our merchants would no doubt be glad to donate household articles as prizes.

The new stop signs at some of the intersections of the highway are a much needed improvement. We are wondering though if all of them are necessary. Cutting the brush along the highway east of the track would help about as much as anything.

What has happened to our new Board of Trade? We haven't heard much of them lately. Isn't it about time that they came forward with some sort of a program for a bigger and better Didsbury?

There is a lot of paper and refuse lying around the streets that need cleaning up.

—"OBSERVER"

## EVANGELICAL NOTES

The sermon subject at Zion Evangelical Church service next Sunday morning will be, "The Simplicity of Christ."

## Present Status of Marquis Wheat

Marquis wheat is still the standard by which all new varieties are measured as they bid for a place on the Western wheat fields. Introduced about 25 years ago it very quickly forged to the front and in a remarkably short time usurped first place among the spring varieties grown both in Canada and the North-Western States. While the original introduction was not quite as uniform in type as one might wish, the prevailing type which characterized the variety was essentially similar to the genuine Marquis we have today.

Unfortunately some ten years ago the Marquis of certain growers, became rather badly contaminated with certain old types commonly found in the late-maturing Red Fife variety, with the result that the variety lost cast in some quarters and was thought to be degenerating. Fortunately the Canadian Seed Growers' Association, with governmental aid, came to realize what was happening and very soon made available new stocks possessing a high degree of purity. These are being propagated rapidly, and as a result this highly prized variety will soon regain the high esteem to which it is entitled.

In growing tests, made during the past three years, of approximately 12,000 samples of wheat collected from farmers' wagons at western elevators, it was found that many farmers were still growing this old mixture of late Fife types and the earlier-maturing Marquis. Others, it was learned, had dropped this wheat, which they believed to be Marquis, and had adopted such varieties as Garret and Reward, but they would not likely have made the change had they had the genuine article.

The systematic clarification of this situation on a comprehensive scale, coupled with a determined effort to assist the maximum number of farmers who happen to have this old stock, in securing better seed, is one of the problems being tackled co-operatively by the Federal and Provincial governments under the auspices of the National Advisory Committee on Agricultural Services.—J. C. Fraser, Central Experimental Farm, Ottawa.

## Fishermen's Luck

Mr. and Mrs. Russell Bertsch and  
Mr. E. H. Morgan, who is fishing at  
the Bessid-stere, were fishing at  
the Big Red last weekend.

Mr. and Mrs. J. S. McGlo-  
Mrs. E. H. Hopkins, Messrs. C. E.  
Reiber, Jas. Kirby, T. Johnson and  
J. W. Hulton traveled the Big Red  
on Sunday as far up as the Coni  
Camp. Fishing was not of the best  
although the gang got sufficient trout  
and grayling to satisfy their ap-  
petites. Even Rastus cried "Null".

Tom Johnson and Jim Hulton  
fished out over Monday and Tues-  
day trying to locate the elusive  
trout. After trying every stream in  
the west country and walking them-  
selves ragged the two finally return-  
ed to the Astell place on the Raven  
and completed the catch with gray-  
ling.

Tom and Jimmie were rather  
disgusted with the trout fishing  
after visiting all the places they had  
been told to go to. One man said  
to go above the Stony about twenty  
miles and there would be  
trout-trout fishing and an abun-  
dant of big ones. The boys went  
up to within seven miles of Burn-  
stick Lake and all they found was  
buck brush and dried out swamp  
lands to wallow through. Another  
chap advised going to Alfred Creek  
on the other side of the Clearwater.

This creek, he said, abounds with  
trout. So after having dinner at  
the mouth of the Stony (where in-  
deed Tom caught four trout  
while Jim prepared the meal) the  
boys hit for the Alfred. After trav-  
elling another empty twenty miles  
only to find no trout in the Alfred  
they camped for the night on the  
Clearwater and returned to the  
Raven on Tuesday where they  
caught a fair mess of grayling.  
This preamble all leads to the  
idea that trout fishing is just about  
over for this year.

A number of locals are going  
on this coming Sunday and staying  
over Labor Day. They have formed  
the idea that the trout are well up  
stream and plan on going far up to  
locate them. We wish them all the  
luck possible but feel that if they  
walk as many miles as the writer  
did they will surely earn every trout  
they manage to catch.

Possibly the best fishing is to be  
found in the Big Red at this time of  
the year. There may not be many  
trout caught, but the grayling are  
plentiful and well worth fishing for.  
Reports from Sundre are to the  
effect that many large grayling are  
being caught near the bridge there  
and a real battle is put up by these  
fish.

## Westerdale Notes

Last Thursday, while cutting  
geentfeed, George Jackson narrowly  
escaped having a real run away  
with his binder-team, when the  
sickle came in contact with a turkey  
hen, which was sitting in the bar-  
ley. After both legs were severed,  
the turkey flew onto the grain  
table, which caused the team to  
bolt, but one of his horses minds  
real well, so of course a serious  
accident was averted.

Everybody is harvesting the past  
few days, grain is stacking up  
well. The saw flies are also at  
their work. People in the district  
are predicting a shortage of pota-  
toes this fall.

## RUGBY NOTES

A free clinic for pre-school child-  
ren, with Dr. H. Cody in charge,  
will be held at the home of Mrs. A.  
Wahl on Wednesday, September  
12th under the auspices of Rugby  
W.L. It is earnestly hoped that  
all mothers with small children will  
take advantage of this opportunity.

## WEEKLY JOKE

The young man walked boldly up  
to the elderly woman whom he had  
mistaken for the principal of the  
finishing school. "May I see Miss  
Parker please?" he asked.  
"May I ask who you are?"  
"You may, I am her brother."  
"Well, well; I'm glad to meet  
you. I'm her mother."

## Notice to Relatives of Persons On the Assesment Roll And to Tenants

Notice is hereby given that during  
the months of September and October  
applications may be made under  
the provisions of sections 188 of the  
Town Act for inclusion in the voters  
list of the Town of Didsbury by the  
following persons, namely:

The wife, husband, father and  
mother, and every son and daughter  
of any person whose name appears  
upon the assessment roll are entitled  
to be placed upon the said list—

- (a) if he or she is resident with  
the said person within the town or  
assisting him in business in respect  
of which he is taxable; and
- (b) if he or she is of the full age  
of twenty-one years; and
- (c) if his or her name does not  
already appear on the roll.

Tenants who have rented an  
assessed parcel for a period of  
twelve months immediately preced-  
ing last day of August of this year.

## TOWN OF DIDSBURY

W. A. Austin, Sec. Treas.  
August 29th, 1934

## Burnside Notes.

Miss Jessie Topley left Monday  
for Edmonton where she will train  
for nurse.

Mr. Jack White of Didsbury was  
Sunday visitor in this district with  
friends.

Mr. and Mrs. Callager and daugh-  
ter of Bessiker spent Sunday with  
Mr. and Mrs. A. E. Thompson.

Miss Joree Jackson and Miss  
Edna Heiber are visiting Miss Helen  
Press.

Miss Edna Sittler and Miss Mar-  
garet Coyne spent Sunday with  
Carstairs friends.

Messrs Geo. Motzard Earl Dodels  
and Mr. and Mrs. N. Ekel were  
Calgary visitors Wednesday.

Mr. Sam McAllister spent Sunday  
with Mr. Noah Ekel.

## Melvin Notes

Mr. Dupont of Calgary is helping  
his son Mr. Emil Dupont with the  
harvest.

Mr. Greig of Trochu was a Sun-  
day visitor with Mr. and Mrs.  
Stuart Greig.

Mr. and Mrs. Ed Vetter and  
family spent Sunday with Mr. and  
Mrs. Peter Johnston.

Mr. and Mrs. August Krebs,  
Eddie and Allen Krebs and Mr.  
O. O. Swingle were in Calgary on  
Tuesday.

Much sympathy is extended to  
Mrs. Leppard and family in the death  
of her daughter, Mrs. Paterson of  
Drumheller.

Visitors at the Carlson home are  
Mrs. Leppard of Faust, Alta. and  
Mr. Norman Carlson of Calgary.

## Westcott Notes.

The Westcott Women's Institute  
met at the home of Mrs. Webster  
on August 23, Mrs. Jacobsen and  
Mrs. Webster being joint hostesses.  
The meeting opened with "O Cana-  
da," and a roll-call was answered  
by naming the number of the most  
interesting page of a magazine.  
After the business session was  
concluded Mrs. Webster took up  
"Canadian History," it being History  
Afternoon. The paper took the  
form of a questionnaire. A 2-minute  
talk on the League of Nations,  
with a description of the buildings  
at Geneva, was given by Mrs. Mac-  
Farlane. Hawaiian guitar selections  
were rendered by the Messrs. Leys-  
good and Fitcher. A Crossword  
Puzzle on the "Early Explorers of  
Canada" was conducted by Miss  
June Jacobsen and proved very in-  
teresting. A recitation by Jean  
Robertson concluded the afternoon's  
program. The National Anthem  
was sung and lunch served. The  
September meeting will take place  
at the home of Mrs. Harry Steckley.

## WORLD HAPPENINGS BRIEFLY TOLD

An unusually severe heat wave in France caused the 184-foot Eiffel Tower to stretch eleven inches upward between sunrise and sunset, engineers said.

The total cost of Great Britain's extended air force program up to 1935 will be about \$100,000,000, the house of lords was informed by the secretary for air, Lord Londonderry.

France has decided to invite all the nations of the world to take part in a great international exhibition in Paris in 1937. Its estimated cost is \$200,000,000.

The British Columbia canned salmon pack during the year ending June 30, 1934, totalled 1,003,929 cases, the Vancouver Merchants' Exchange reported. In the preceding year the pack totalled 830,236 cases. Hundreds of acres of sugar beets that failed to germinate because of the drought, have been plowed under by farmers in the Chatham district, according to W. H. Riddle, of the Ontario department of agriculture.

Premier T. D. Pattullo of British Columbia announced that a monument in Mount Robson Park in British Columbia was named "Mount George Graham" in honor of Rt. Hon. George P. Graham.

Establishment of a free wheat market in the Soviet Union has been announced, and will take effect after delivery of the present harvest. The decision was made in June by the Communist party congress.

Hon. Irene Patillo, U.F.A. member for Alia and minister without portfolio in the provincial cabinet, announced at a U.F.A. constituency convention that she would not stand for nomination again.

Italy has accepted the British government's invitation to engage in conversations prior to the 1935 naval conference, and the Italian declaration will be in London at the end of the summer or the beginning of the fall.

Ramatch Charley, the first Indian to make a flight from India to England has started on the first stage of his planned flight around the world. He is going first through Baghdad, Aleppo and Istanbul, travelling eastwards.

Canada's total exports of paper and manufactures of paper during June were \$7,277,892. This was lower than in May when the total was \$8,674,867, but considerably greater than June of last year when it was \$5,188,610.

## Unearth Sea Serpent

Ancient Specimen Is Discovered By Geologists In Alabama

What may be the "daddy" of sea serpents, a meosaurus, has been unearthed in exploration of the Alabama geological department, Dr. Walter L. R. Jones, state geologist, disclosed recently.

"We have already taken out 10 feet of a 35-foot meosaurus near West Green, in Greene county, that probably is 70,000,000 years old," Dr. Jones said.

And in the same county near Etowah, we have unearthed a two-ton turtle, possibly as old. Both were found in chalk of the cretaceous age."

The Canadian flouring industry provides a market for about 15 million bushels of Canadian grown barley in the manufacture of food products and feeds.

W. N. U. 2567

## Owes Freedom To King

Man Who Hurlled Bottle At Royal Car Discharged

A man who hurled a bottle at the king and queen was discharged at police court hearing and, it was believed, had the king to thank for it. The object was thrown as Their Majesties were motoring to Edinburgh from Heaththill. It struck the pavement a few yards behind the royal car.

His Majesty expressed a wish the man be freed, it was understood.

By Ruth Rogers

THE SAILOR "GAL" DRESSES A FAVORITE WITH GROWING DAUGHTER—IT'S SO SMART—PRACTICAL.

Here's an attractive little model. Little daughter will be so proud to wear it. Don't you think it really lovely? And it's so easily fashioned for a very small outlay. You'll be surprised.

It can be white linen, peasant cotton, poplin, lawn, etc. Make the sailor collar, tie and belt of navy blue. A blue leather belt can be worn, if you prefer it.

The tailored sleeves with plaits are especially smart and cool. Similar plaits in the skirt allow plenty of freedom for action.

Another nice idea is to carry it out in nautical blue and white dotted poplin with white poplin trim. Style No. 425 is designed for sizes 8, 10, 12 and 14 years. Size 8 requires 2 1/2 yards of 39-inch material with 1 yard of 39-inch contrasting and 3 1/2 yards of braid.

Price of pattern 20 cents in stamps or coin (cash is preferred). Wrap coin carefully.

## Little Journeys In Science

RAYON

(By Gordon H. Guest, M.A.)

Rayon, or artificial silk, which has become in recent years a widely used product, resembles good paper in that it consists of pure cellulose. Four different processes have been perfected for its manufacture, but of these the viscose process is used for over 80 per cent of the world's rayon production.

High grade sulphate wood pulp (usually taken from spruce trees), is the starting point for the production of artificial silk. Canada supplies almost 40 per cent of the world's requirement of wood for this purpose. This material, which consists largely of cellulose, is treated for two hours with a weak solution of caustic soda, which results in the formation of alkali cellulose. Surplus moisture is squeezed out of this alkali cellulose, and the material is then torn to shreds, which are left for 24 hours in a closed vessel.

A liquid known by chemists as carbon disulphide is now added, producing a solution called viscose. This solution is allowed to "ripen" for a day or two, after which it is ready for spinning. This is accomplished by forcing the viscose through fine holes, into a preparation of dilute sulphuric acid. The acid causes the fine jets of liquid to change into threads, which are spun into the material we know as rayon.

This artificial silk is altogether different from the natural product. It lacks the tensile strength of pure silk, but it has a fine appearance, and is combined with its cheapness, has led to it being used extensively either alone or as a mixture with wool or cotton.

## Noted Talking Bird Dead

Provided Amusement For Many Visitors To St. Louis Zoo

Jocko, famous talking Mima, one of the various Oriental starling-like birds, at the St. Louis zoo, is dead from old age.

Jocko amused zoo visitors for six years. His repertoire included the following phrases: "Hello yay," "Hello Jocko," "How do you like the zoo?" "Anybody home?" and "Boy, how much money you got?"

Jocko appeared in several talking newscasts. He will be replaced by another Mima, which was Jocko's unduly.

## NEW CANARD WHITE STAR LINER

Making her first arrival at Montreal under the house flags of the new Canard White Star Limited, the S.S. Laurette, 19,000-ton liner docked at Montreal, Saturday, July 14, from Glasgow, Belfast and Liverpool. Her master is Captain R. Sewell Quinn, and she sailed off again from Montreal on her last departure under the new regime on July 20.

## An Envious Record

Swiss Air Liners Operate Twelve Years With No Fatalities

Despite the natural difficulties faced by aviation in Switzerland, a notable record of efficiency has been set in commercial flying in this country.

Since the founding of the first commercial line in 1922, not one fatal accident has occurred on a Swiss line in the transportation of passengers, mail or freight. During this period a total of over 6,000,000 kilometers (3,660,000 miles) have been flown.

The high standard of aviation in Switzerland is credited to a large extent to the ability of the pilots. In the Swissair, the chief air transport company, each of the pilots has had from eight to fifteen years' flying experience. All pilots employed by this organization must pass through the arduous and rigorous school of military aviation and are especially trained in blind flying and landings in the rough country general to Switzerland. Furthermore, the pilots must be trained in the school of acrobatic flying.

On the express line Zurich to Vienna—reputed to be the fastest in Europe, American aeroplanes are employed. These aeroplanes, because of their performance, have greatly improved the position of American aeronautical products in Europe. The Swissair is so satisfied with the results obtained that it is planning to use American aeroplanes throughout its entire air fleet.

## Better Value For Money

British Postmaster-General Announces New Stamp Issue

Britain is to have new postage stamps this summer. The first announcement of the change was made by Sir Kingsley Wood, postmaster-general.

The main change will be in the preparation and in the appearance of the new stamps. The actual design and size will not be altered, but colors will be deeper.

"They will be better in appearance and quality than the present stamps—better value for the money," said an official of the post office.

The new stamps will be prepared by the photographic method instead of surface printing.

Church steeples are descended from the tower of Babel, architecturally, the ancient idea being to approach heaven as nearly as possible in worship.

## Agricultural Notes

Interesting Items Gleaned From Many Sources

Cattle can eat poison ivy with impunity but dogs are poisoned by it.

For the past seven weeks, the amount of United States wheat in Canada has been shown as two bushels. On July 6 last year, the amount was 3,950,798 bushels.

In tests for feeding dairy cattle at Montana, it was found that the consumption of hay by growing heifers was increased by diluting molasses and sprinkling over the hay.

With the exception of corn and sugar beets which show increases, there is little change in the averages of late-sown crops in Canada, according to the preliminary estimate.

The export of Canadian cattle to Great Britain for this year up to July 12 totalled 26,115 head as compared with 23,961 during the corresponding period of last year.

For the first 28 weeks of 1934, ending July 12, the number of hogs graded in Canada was 1,710,746, a decrease of 55,339 compared with the same period of last year.

Butter, raisins and dried currants, wheat and wheat flour are the four Australian products which do not receive the benefits of the British preferential tariff when imported into Canada.

"Handpicked" in the Fruit and Honey Act, 1934, means that, as applied to apples, pears, peaches, apricots, and cherries, they will be considered handpicked unless they show evidence of rough handling or of having been on the ground.

The exporting of approximately a million pounds of Canadian poultry during the last three or four months has had a very beneficial effect on the Canadian market and has opened up an encouraging avenue of trade for subsequent development.—Egg and Poultry Market Review.

The thorn apple, a poisonous weed belonging to the nightshade and potato family, has a variety of names—Jamestown or Jimson weed, stramonium, devil's apple, mad apple, and stinkwort. Canadian Indians speak of it as "the white man's plant." It was introduced into Canada among garden seeds.

Marketings of wheat in the prairie provinces up to June 29, 1934, as compared with the corresponding period of 1932-33, were, figures within brackets being those for 1932-33: Manitoba, 27,703,972, (\$37,275,275) bushels; Saskatchewan, 106,419,150 (182,339,342) bushels; Alberta, 82,360,217 (140,694,307) bushels.

The methods used by our fathers are frequently held up to us as ideals. Many of these have been verified by scientific study, others have been disproven. I am sure our grandfathers tried to follow the best methods evolved by our forefathers and disprove any of doubtful value. It is up to us to do the same. Science endeavours to establish the truth.—J. F. Hockley, Dominion Laboratory of Plant Pathology, Kentville, N.S.

In order to ascertain the suitability of potato flakes as cattle fodder, researchers have been made in Germany where potato flakes have been manufactured for a number of years. Based on the feeding value of the product, a conclusion has been reached that they may be used with satisfactory results. Mixed with other feeding stuffs, they are said to be suitable for hogs and poultry.

Prince George is to present to the Edinburgh Zoo three lion cubs given to him by the municipality of Lydenburg, Transvaal, during his present visit to South Africa.

## New Elevator Completed.

No time was lost in the erection of the new Alberta Pacific elevator which was completed in less than a month after start of work. The crew commenced on July 25th to take down the old building and had the new structure completed and ready for business on August 23rd.

Originally planned as a 10,000 bushel capacity, the building was enlarged slightly to make the capacity 45,000 bushels. The machinery is of the very latest type.

## Facts About Shooting Season

There will be no change in the season for shooting ducks and geese this fall. Local hunters will be able to shoot ducks and geese from noon Saturday, September 15, to November 14, inclusive. Due to the exceedingly dry weather this summer which reduced the number of water fowl, prospects do not appear any too bright for this line of sport.

The Hungarian partridge season will also be open September 15 and will continue until the middle of December, providing plenty of time to hunt these sporty birds.

A year ago there was an open season on ruffed grouse. However, there will be a short season this fall, from October 1 to 15. It will be possible to hunt sharp tailed grouse, better known as prairie chicken, from October 1 to 15.

As usual, this season will be closed for pheasants.

## HERE and THERE

Canadian Pacific flagship Empress of Britain claimed a new record recently for the Quebec-Cherbourg Atlantic crossing, making the trip in four days, six hours and fifty-eight minutes, being thirty-four minutes under her own previous record set in August, 1933.

Montagu Norman, governor of the Bank of England, whose evasive tactics have given newspaper men some strenuous times in the past few years, actually posed for a photograph aboard Canadian Pacific liner Duchess of Bedford on his return to England recently. "Wait till I get my hat on straight," was his comment to the astonished and gratified photographer.

Railway building is by no means at an end in Canada. E.W. Bentley, R.C. chairman and president of the Canadian Pacific Railway, stated recently following an extended inspection trip through Western Ontario, "Consolidation of our development will probably mean construction of more railway mileage to outlying districts as prospects and development warrant," he said.

## LOCAL & GENERAL

Les. Roeth of Seattle, Washington is visiting with his parents.

Mr. E. E. Wilson of Chilliwack is visiting here with relatives.

Mr. and Mrs. Jack Pearson and Mrs. H. C. Liesemer are holidaying at Sylvan Lake.

Good quality writing pads of first class paper, 100 sheets per pad 25c—Pioneer Office.

Mr. Simon McGill left Friday night for Edmonton to attend the convention of Alberta Millers.

Mrs. Harry Pearson is spending a few days with Mrs. Parker Reid in Calgary.

Miss Jessie McCay returned home this weekend from a visit with Drumheller friends.

Mr. and Mrs. E. S. Brooker of Hanna are visiting their uncle Mr. Big Brooker.

Tommy Johnson, Clint Reiber and Jim Kirby were Calgary visitors Wednesday.

Mrs. White of Chilliwack, B.C. is visiting at the home of her son, Mr. G. O. Fogg.

Mr. and Mrs. A. Brusco and Alf have returned from their vacation at Victoria and other B.C. points.

Mr. H. O. Tonjum of Rocky Mountain House was renewing old acquaintances here over the weekend.

A. Melvin Anderson, Sight Specialist, will make his next visit to Didsbury, at the Rosbud Hotel, Tuesday, September 4th.

Mrs. A. W. Thoren of Berkeley, California is visiting her brother, Mr. Ivan Weber, and sister Mrs. Ira Lovagood.

Mr. George Julien and family have moved to Sundre for the next two weeks where Mr. Julien will manage the Crystal Dairy plant.

The Misses Jean, Phyllis and Arlene McNeil returned to their home on Sunday after spending a very enjoyable vacation with relatives at Crossfield.

Mrs. E. B. Hopkins who has been visiting with her mother, Mrs. Saxenby for the past few weeks returned on Wednesday to resume her duties at Los Angeles.

Dr. Arnold Liesemer of Chicago is a visitor with his parents Mr. and Mrs. W. G. Liesemer. He is accompanied by Dr. Williams, also of Chicago.

Mrs. A. Roe and daughter Shirley of Vancouver and Miss Viola Kiteley, also of Vancouver, are visitors with Mr. and Mrs. Alex. McLaughlin, Mrs. Roe's parents.

The September meeting of St. Cyril's W. A. will be held at the home of Mrs. W. S. Durrer on Friday, September 7th. All members are asked to be present.

Mr. and Mrs. Harry Pearson, the Misses Alice and Mollie Pearson and Mr. Frank Heslton returned last weekend from an auto vacation in Washington.

Ad-hoc Garage have installed a new greasing stand at the rear of their garage, which is a great convenience for working underneath cars, and trucks and for greasing same.

Mr. and Mrs. Fred Reiffenstein and son, accompanied by Mr. and Mrs. B. F. Gage and Mr. and Mrs. N. E. Hughes spent Sunday at Banff and Lake Louise, celebrating Mrs. Reiffenstein's birthday.

We believe that Mr. Landeen will receive the honor of being the first to thresh in the Melvin district. He threshed a field of barley August 22nd which was seeded April 26th and cut August 2nd. He reports a very good yield.

Rev. A. D. Currie of the Anglican Church has returned from his vacation at the coast and will resume his duties at the local church with a Holy Communion service on Sunday morning at 11 o'clock. Other services appear in the Church Announcements.
